

PRESS RELEASE

Tokyo, Japan/ August 18, 2025, LIVE BOARD, INC.

**Live Board**

## **“Machinavision,” Located in Kashima City, Ibaraki Prefecture Launches Digital OOH Advertising Based on Impressions (VAC)**

LIVE BOARD, INC. will connect the “Machinavision”, operated and managed by SEIBIDOU to the LIVE BOARD Marketplace\*1 starting Monday, August 18, 2025.

In addition to the conventional sales method of specifying the delivery period and frequency, NTT DOCOMO's location data and analysis technology will enable this digital media to sell impressions (VAC)\*2 based on the number of people who can be estimated to have actually viewed the advertisement.

Machinavision is located near the largest shopping mall in Kashima City, Ibaraki Prefecture, occupying a prime location adjacent to National Route 124, which boasts the highest traffic volume in the surrounding area. Located at an intersection, it effectively captures the attention of pedestrians waiting at traffic lights. It also features high-brightness LEDs that remain highly visible even under direct sunlight, ensuring excellent visibility.

LIVE BOARD will continue to create new value for the OOH market through effective, efficient advertising management, and will further promote the realization of advertising distribution that is adaptable to diverse lifestyles.

\*1 Refers to the entire advertising platform operated by LIVE BOARD, including functions such as SSP (Supply Side Platform) and DSP (Demand Side Platform).

\*2 LIVE BOARD uses impressions that take into account the visibility rate based on visibility surveys (VAC = Visibility Adjusted Contact / total number of people who saw the ad), as recommended in the OOH Global Measurement Guidelines. Of the number of people in the viewing area of a medium (OTS = Opportunity to See), the number of people who may come into contact with an OOH ad (OTC = Opportunity to Contact / takes into account the direction of movement within the viewing area and the presence of obstacles) is defined. The number of people who are likely to actually see the advertisement (VAC) is estimated by adding the visibility rate for each media to this number.

## ■ About LIVE BOARD, INC.

**An operator of a digital OOH ad network that achieves data-driven targeting and effectiveness verification.**

LIVE BOARD is the first company in Japan to achieve impression (VAC)-based advertisement delivery in OOH. We deploy advertisement delivery and billing systems in accordance with actual conditions that are based on the estimated number of viewers "at that time, in that place, and for that specific ad," even during the COVID-19 pandemic, when people's movement patterns are prone to change. In addition, by combining big data from Japan's largest carriers with our own network, which includes a wide range of digital OOH across Japan, including outdoor, indoor, train, and station OOH ads, we have been able to deliver personalized ads, such as targeting by gender and age, that was not possible with traditional OOH.

Company Name: LIVE BOARD, INC.
