Live Board

Umeda Grand Vision Launches Digital OOH Advertising Based on Impressions (VAC)

**Large digital signage on the upper wall of the concourse
in front of Hankyu Department Store Umeda Main Store**

LIVE BOARD, INC. will connect the “Umeda Grand Vision”, operated and managed by hankyu hanshin marketing solutions Inc. to the LIVE BOARD Marketplace*1 starting Monday, May 12, 2025.

In addition to the conventional sales method of specifying the delivery period and frequency, NTT DOCOMO's location data and analysis technology will enable this digital media to sell impressions (VAC)*2 based on the number of people who can be estimated to have actually viewed the advertisement.

“Umeda Grand Vision” is a large digital signage installed on the hanging wall in the north plaza of the concourse in front of the Hankyu Department Store Umeda Main Store. in the center of Umeda, Osaka. As the main flow line of Osaka-Umeda Station, which connects the JR Line, Hanshin Main Line, Osaka Metro Midosuji Line, and Osaka Metro Tanimachi Line, it is conveniently located where people flow from north to south and from east to west, catching the attention of many people. The attraction of this location is its dynamic, large LED display, which boasts high visibility even from a distance.

LIVE BOARD will continue to create new value for the OOH market through effective, efficient advertising management, and will further promote the realization of advertising distribution that is adaptable to diverse lifestyles.

*1 This refers to the entire DOOH advertising space (inventory) handled by LIVE BOARD, including its own and other companies'.

*2 LIVE BOARD uses impressions that take into account the visibility rate based on visibility surveys (VAC = Visibility Adjusted Contact / total number of people who saw the ad), as recommended in the OOH Global Measurement Guidelines. Of the number of people in the viewing area of a medium (OTS = Opportunity to See), the number of people who may come into contact with an OOH ad (OTC = Opportunity to Contact / takes into account the direction of movement within the viewing area and the presence of obstacles) is defined. The number of people who are likely to actually see the advertisement (VAC) is estimated by adding the visibility rate for each media to this number.

◆ About LIVE BOARD, INC.

An operator of a digital OOH ad network that achieves data-driven targeting and effectiveness verification.

LIVE BOARD is the first company in Japan to achieve impression (VAC)-based advertisement delivery in OOH. We deploy advertisement delivery and billing systems in accordance with actual conditions that are based on the estimated number of viewers "at that time, in that place, and for that specific ad," even during the COVID-19 pandemic, when people's movement patterns are prone to change. In addition, by combining big data from Japan's largest carriers with our own network, which includes a wide range of digital OOH across Japan, including outdoor, indoor, train, and station OOH ads, we have been able to deliver personalized ads, such as targeting by gender and age, that was not possible with traditional OOH.
