

PRESS RELEASE

Tokyo, Japan/ July 18, 2025, LIVE BOARD, INC.

Live Board

Kobe Sannomiya Digital Signage Launches Digital OOH Advertising Based on Impressions (VAC)

LIVE BOARD, INC. will connect the "Kobe Sannomiya Digital Signage", operated and managed by hankyu hanshin marketing solutions Inc. to the LIVE BOARD Marketplace*1 starting Monday, August 4, 2025.

In addition to the conventional sales method of specifying the delivery period and frequency, NTT DOCOMO's location data and analysis technology will enable this digital media to sell impressions (VAC)*2 based on the number of people who can be estimated to have actually viewed the advertisement.

"Kobe Sannomiya Digital Signage" includes a total of 10 screens outside the west and east ticket gates of Kobe-Sannomiya Station on the Hanshin Main Line, and is expected to reach a large number of station users and passersby. LIVE BOARD recently announced the first connection to the LIVE BOARD Marketplace in the Kobe area in January 2025 and anticipate increased appeal with this new addition of Kobe Sannomiya Digital Signage.

LIVE BOARD will continue to create new value for the OOH market through effective, efficient advertising management, and will further promote the realization of advertising distribution that is adaptable to diverse lifestyles.

*1 Refers to the entire advertising platform operated by LIVE BOARD, including functions such as SSP (Supply Side Platform) and DSP (Demand Side Platform).

*2 LIVE BOARD uses impressions that take into account the visibility rate based on visibility surveys (VAC = Visibility Adjusted Contact / total number of people who saw the ad), as recommended in the OOH Global Measurement Guidelines. Of the number of people in the viewing area of a

medium (OTS = Opportunity to See), the number of people who may come into contact with an OOH ad (OTC = Opportunity to Contact / takes into account the direction of movement within the viewing area and the presence of obstacles) is defined. The number of people who are likely to actually see the advertisement (VAC) is estimated by adding the visibility rate for each media to this number.

◆About LIVE BOARD, INC.

An operator of a digital OOH ad network that achieves data-driven targeting and effectiveness verification.

LIVE BOARD is the first company in Japan to achieve impression (VAC)-based advertisement delivery in OOH. We deploy advertisement delivery and billing systems in accordance with actual conditions that are based on the estimated number of viewers "at that time, in that place, and for that specific ad," even during the COVID-19 pandemic, when people's movement patterns are prone to change. In addition, by combining big data from Japan's largest carriers with our own network, which includes a wide range of digital OOH across Japan, including outdoor, indoor, train, and station OOH ads, we have been able to deliver personalized ads, such as targeting by gender and age, that was not possible with traditional OOH.
