

PRESS RELEASE

Tokyo, Japan/ March 16, 2026, LIVE BOARD, INC.

Live Board

In front of Sannomiya Station “M-INT VISION” Launch Digital OOH Advertising Based on Impressions (VAC)

LIVE BOARD, INC. will connect the “M-INT VISION”, to the LIVE BOARD Marketplace^{*1} starting Monday, March 23, 2026.

In addition to the conventional sales method of specifying the delivery period and frequency, NTT DOCOMO's location data and analysis technology will enable this digital media to sell impressions (VAC)^{*2} based on the number of people who can be estimated to have actually viewed the advertisement.

“M-INT VISION” is located on the third floor of the west facade of “M-INT KOBE” a commercial complex in front of Sannomiya Station in central Kobe, in a prime location that captures attention from the pedestrian deck. Sannomiya Station is one of Hyogo Prefecture’s largest terminal stations, serving as a hub for six rail lines, including JR West, Hankyu Railway, Hanshin Electric Railway, the Kobe Municipal Subway, and Kobe New Transit (Port Liner). As a result, it offers the potential to reach a wide range of audiences, including not only residents of the Sannomiya area but also tourists.

LIVE BOARD will continue to create new value for the OOH market through effective, efficient advertising management, and will further promote the realization of advertising distribution that adapts to diverse lifestyles.

^{*1} Refers to the entire advertising platform operated by LIVE BOARD, including functions such as SSP (Supply Side Platform) and DSP (Demand Side Platform).

*2 LIVE BOARD uses impressions that take into account the visibility rate based on visibility surveys (VAC = Visibility Adjusted Contact / total number of people who saw the ad), as recommended in the OOH Global Measurement Guidelines. Of the number of people in the viewing area of a medium (OTS = Opportunity to See), the number of people who may come into contact with an OOH ad (OTC = Opportunity to Contact / takes into account the direction of movement within the viewing area and the presence of obstacles) is defined. The number of people who are likely to actually see the advertisement (VAC) is estimated by adding the visibility rate for each media to this number.

*3 Kyushu Railway Company "[Top 300 Stations by Passenger Volume \(Fiscal Year 2024\)](#)"

■ About LIVE BOARD, INC.

An operator of a digital OOH ad network that achieves data-driven targeting and effectiveness verification.

LIVE BOARD is the first company in Japan to achieve impression (VAC)-based advertisement delivery in OOH. We deploy advertisement delivery and billing systems in accordance with actual conditions that are based on the estimated number of viewers "at that time, in that place, and for that specific ad," even during the COVID-19 pandemic, when people's movement patterns are prone to change. In addition, by combining big data from Japan's largest carriers with our own network, which includes a wide range of digital OOH across Japan, including outdoor, indoor, train, and station OOH ads, we have been able to deliver personalized ads, such as targeting by gender and age, that was not possible with traditional OOH.
